SHORT REELING OF COTTON YARN.

No. 331.—The hand-loom weavers in this Presidency obtain their supply of cotton yarn largely from Indian mills. It has been brought to the notice of Government that some spinning mills apply false trade descriptions to the bundles of cotton yarn sold to the hand-loom weavers, and that the present practice of short-reeling of skeins or of reducing the length contained in a hank and the substitution of yarn of a coarser count than that marked on the bundle is carried on by some of the mills at the request of the yarn merchants. Such fraudulent practices carried out with the knowledge of the mills render them liable to prosecution under section 6 of the Indian Merchandise Marks Act of 1889.* Section 7 of the Act applies to yarn merchants who sell, expose or have in possession for sale or for any purpose of trade or manufacture, short-reeled yarns whose counts are not as indicated on the bundles. Dealers in yarn are therefore warned that they should see that the correct count is marked on the label of each bundle before yarn is sold to hand-loom weavers.

* Extracted below.

Extract of Sections 6 and 7 of the Indian Merchandise Marks Act, 1889.

6. If a person applies a false trade description to goods, he shall, subject to the provisions of this Act, and unless he proves that he acted without intent to defraud, be punished with imprisonment for a term which may extend to three months, or with fine which may extend to two hundred rupees, and in case of a second or subsequent conviction with imprisonment which may extend to one year, or with fine, or with both.

7. If a person sells, or exposes or has in possession for sale or any purpose of trade or manufacture any goods or things to which a false trade description is applied, he shall (unless he proves)

(a) that, having taken all reasonable precautions against committing an offence against this section, he had at the time of the commission of the alleged offence no reason to suspect the genuineness of the trade description, and

(b) that, on demand made by or on behalf of the prosecutor, he gave all the information in his power with respect to the persons from whom he obtained such goods or things, or

(c) that otherwise he had acted innocently, be punished with imprisonment for a term which may extend to three months, or with fine which may extend to two hundred rupees, and in case of a second or subsequent conviction with imprisonment which may extend to one year, or with fine, or with both.

Extract from Government of India Notification No. 1474, dated 13th November 1891 as amended by Notification No. 6233, dated the 10th November 1923.

III. A trade description of count or number, length or weight, applied to *grey* or *bleached cotton* yarn shall not be deemed to be false in a material respect, unless—

(a) the described count or number is greater or less than the actual count or number by more than *two* per cent. provided that the average count of the whole of the yarn in question is not greater or less than the described count; or

(b) (i) in a bundle of *grey* yarn, the average length of the whole number of single hanks is less than 840 yards and of double hanks is less than 1,680 yards, or

(ii) in a bundle of *bleached* yarn, the average length of single hanks is less than 810 yards and of double hanks is less than 1,638 yards; or

(c) (i) in a bundle of yarn of any count under 80, described as being 10 lb. in weight, the number of knots of 20 hanks each is not half of, or the number of knots of 10 hanks each is not the same as, or the number of knots of 5 hanks each is not double, the described count or number of the yarn; or

(ii) in a bundle of yarn of any count under 80, described as being 5 lb. in weight, the number of knots of 20 hanks each is not a quarter of, or the number of knots of 10 hanks each is not half of, or the number of knots of 5 hanks each is not the same as, the described count or number of the yarn, or

(iii) in a bundle of yarn of any count from 80 upwards, the number of knots of 20 hanks each is not half, or the number of knots of 40 hanks each is not a quarter, when the described weight is 10 lb., or is not a quarter or an eighth, when the described weight is 5 lb. of the count or number of the yarn; or

(f) in the case of bleached yarn, the described weights exceeds the actual weight by more than—

10 per cent in counts up to 24;

5½ per cent in counts from 25 to 40.

7½ per cent in counts of 42 and upwards;

the allowances being one per cent less than that specified in each of the above cases if the bleached yarn in the bundle is two fold.

Provided that for the purposes of applying any of the sub-clauses of clause (f) to imitations of single yarn or double hanks and of two-fold yarn in single and double hanks, one single hank of two-fold yarn, one double hank of single yarn, and one double hank of two fold yarn shall be taken respectively as two, two and four hanks of single yarn, but the described count or number shall contain a definite indication that the yarn in the bundle is two fold or in double hanks or both, as the case may be.

IV. A trade description of count or number applied to a bundle of dyed cotton yarn shall be accepted as indicating length only, the hank being taken to measure 840 yards, and it shall be deemed to be false in a material respect if the average length of the hanks in a bundle is less than 816 yards.

V. A trade description of length applied to thread of any kind (of cotton, wool, flax or silk) shall not be deemed to be false in a material respect, unless it exceeds the actual length by more than one per cent.

VI. The dimensions of goods on which their length or width is stamped shall be determined by measurement in imperial yards of 36 inches.

It is impossible to find them jobs nor is it possible to repatriate them. Intending emigrants of this class are therefore warned against the risk they run by proceeding to Malaya at present in search of employment in the absence of definite engagements obtained prior to their departure from India.

(3) The cost of cleansing or disinfecting any premises or part thereof or any article therein under sub-clause (2) shall be paid by the occupier of such premises provided that such cost may be met entirely by the Corporation if the occupier is from poverty unable to pay the said cost.

The earnest money will be retained in the case of the successful tenderer and will not carry any interest. It will be dealt with as provided in the tender.

4. When a tender is to be accepted, the tenderer whose tender is under consideration shall attend the Division office on the date fixed by written intimation to him. He shall forthwith upon intimation being given to him by the Executive Engineer of acceptance of his tender make a security deposit of Rs. 150 (rupees one hundred and fifty only) in one of the forms prescribed in the Madras Public Works Account Code and sign an agreement in the proper departmental form for the due fulfilment of the contract. 5. The tenderer shall examine closely, the Madras Detailed Standard Specifications, and also the Standard Preliminary Specification contained therein, and sign the Divisional office copy of the Madras Detailed Standard Specifications and its addenda volume in token of such study before submitting his tender unit rates which shall be for finished work in situ. He shall also carefully study the drawings and additional specifications and all the documents which form part of the agreement to be entered into by the accepted tenderer. The Madras Detailed Standard Specifications and other documents connected with the contract such as specifications, plans, descriptive specification sheet regarding materials, etc., can be seen at any time between 11 a.m. and 5 p.m., on office days, in the office of the Executive Engineer, Kistna Special Division.

6. The tenderer's attention is directed to the requirements for materials under the clause "Materials and workmanship" in the "Preliminary Specification". Materials conforming to the British Standard Specifications shall be used on the work, and the tenderer shall quote his rates accordingly.

7. Every tenderer is expected, before quoting his rates, to inspect the site of the proposed work. He should also inspect the quarries, and satisfy himself about the quality and availability of materials. The names of quarries, kilns, etc., wherefrom certain materials are to be obtained will be given in the Descriptive Specification Sheet. The best class of materials to be obtained

from the quarries or other source defined shall be used on the work. In every case the materials must comply with the relevant standard specifications. Samples of materials as called for in the standard specifications, or in the tender notice, or as required by the Executive Engineer in any case, shall be submitted for the Executive Engineer's approval before the supply to site of work is begun. If the contractor, after examination of the source of materials defined in the Descriptive Specification Sheet, is of opinion that materials complying with the standard or other specifications of the contract cannot be obtained in quality or sufficient quantity from the source defined in the Descriptive Specification Sheet, he shall so state clearly in his tender and state wherefrom he intends to obtain materials, subject to the approval of the Executive Engineer.

The Government will not, however, after acceptance of a contract rate pay any extra charges for lead or for any other reason, in case the contractor is found later on to have misjudged the materials available. Attention of the contractor is directed to the standard "Preliminary Specification" regarding payment of segregago, tolls, etc.

The rates should be written both in words and figures and the units in words. The tenderer should also show the totals of each item and the grand total of the whole contract, and quote in the tender a lump sum for which he will undertake to do the whole work subject to the conditions of contract. This earnest money will be refunded to the unsuccessful tenderer on application, after intimation is sent of rejection of the tender or at the expiration of two months from date of tender, whichever is earlier. The refund will be authorised by the Executive Engineer by suitable endorsement on the challan. This earnest money will not be received in cash or currency notes by the Public Works Department officers, save in exceptional cases, where there are no treasuries or banks within the jurisdiction of the officer calling for tenders. When currency notes are given, the tenderer should sign his name in full with date, on the back of all the currency notes given by him, whatever their denominations may be.

The earnest money will be retained in the case of the successful tenderer, and will not carry any interest; it will be dealt with as provided in the tender

4. When a tender is to be accepted the tenderer whose tender is under consideration shall attend the Division office on the date fixed by written intimation to him. He shall forthwith upon intimation being given to him by the Executive Engineer of acceptance of his tender make a security deposit of Rs 75 (rupees twenty-five only) in one of the forms prescribed in the Madras Public Works Account Code and sign an agreement in the proper departmental form for the due fulfilment of the contract. This security deposit together with the earnest money and the amount withheld according to clause 6A of the standard preliminary specification of the Madras Detailed Standard Specifications will be retained as security for the due fulfilment of this contract. If no such security deposit is made by the contractor he shall follow the procedure laid down in the preceding paragraph for the payment of earnest money and such deposit will not bear interest. Failure to enter into the required agreement or to make the security deposit as demanded in this paragraph shall entail forfeiture of the earnest money.

5. The tenderer shall examine closely the Madras Detailed Standard Specifications, and also the Standard Preliminary Specification, contained therein, and upon the Divisional office copy of the Madras Detailed Standard Specifications and its addenda volume in token of such study before submitting his tender unit rates which shall be for finished work in situ. He shall also carefully study the drawings and additional specifications and all the documents which form part of the agreement to be entered into by the accepted tenderer. The Madras Detailed Standard Specifications and other documents connected with the contract, such as specifications, plans, descriptive specification sheet regarding materials, etc., can be seen at any time between 11 a.m. and 5 p.m., on office days, in the office of the Executive Engineer, Godavari Eastern Division.

6. The tenderer's attention is directed to the requirements for materials under the clause "Materials and workmanship" in the "Preliminary Specification." Materials conforming to the British Standard Specifications shall be used on the work, and the tenderer shall quote his rates accordingly

7. Every tenderer is expected, before quoting his rates, to inspect the site of the proposed work. He should also inspect the quarries and satisfy himself about the quality and availability of materials. The names of quarries, kilns etc., wherefrom certain materials are to be obtained will be given in the Descriptive Specification Sheet. The best class of materials to be obtained from the quarries or other source defined shall be used on the work. In every case the materials must comply with the relevant Standard Specification. Samples of materials as called for in the Standard Specifications, or in the tender notice, or as required by the Executive Engineer in any case, shall be submitted for the Executive Engineer's approval before the supply to site of work is begun. If the contractor, after examination of the source of materials defined in the Descriptive Specification Sheet, is of opinion that materials complying with the standard or other specifications of the contract cannot be obtained in quality or sufficient quantity from the source defined in the Descriptive Specification Sheet, he shall so state clearly in his tender and state wherefrom he intends to obtain materials, subject to the approval of the Executive Engineer.

The Government will not, however, after acceptance of a contract rate pay any extra charges for lead or for any other reason, in case the contractor is found later on to have misjudged the materials available. Attention of the contractor is directed to the Standard "Preliminary Specification" regarding payment of mileages, lolis, etc.

8. The tenderer's particular attention is drawn to the conditions and the directions to parties tendering and details on the B-2 form and also to the sections and clauses in the Standard "Preliminary Specification" dealing with—

(1) test, inspection and rejection of defective materials and work;
(2) carriage;
(3) construction plant;
(4) water and lighting;
(5) cleaning up during progress and for delivery;
(6) accidents;
(7) delays; and
(8) particulars of payment.

The contractor should closely peruse all the specifications clauses which govern the rates which he is tendering.

9. A schedule accompanies this tender notice. It shall be definitely understood that this schedule is liable to alterations by omissions, deductions, or additions at the discretion of the Executive Engineer, Godavari Eastern Division. The rate tendered should be for the finished work *in situ* inclusive of all incidental charges connected with execution. He should quote specific rates for each item in the schedule and the rates should be in rupees, annas and in sums of three pies. The rates should be written both in words and figures and the units in words. The schedule shall be written legibly and free from erasures, overwritings or conversions of figures. Corrections, where unavoidable, should be made by crossing out, initialing, dating and rewriting.

10. Tenders offering a percentage deduction from or increase on the est mate amount, and those not submitted in due time will be rejected. Rates for items not called for shall not be included in the tender. No alteration which is made by the tenderer in the contract form, the conditions of contract, the drawings, specifications, or quantities accompanying same will be recognized; and if any such alterations are made, the tender will be void.

11. The tenderer should work out his own rates, without reference being made to the Public Works Department current schedule of rates or to the Public Works Department estimate rates which are not open for inspection by tenderers.

12. The sources from which certain particular materials shall be obtained by the contractor are given at the end of the schedule accompanying the tender form. Tenderers shall quote their rates for finished work. No carriage or incidental charges will be borne by Government in connection with this supply.

13. No part of the contract shall be publet without written permission of the Executive Engineer nor shall transfer be made by power-of-attorney authorizing others to receive payment on the contractor's behalf.

14. If further necessary information is required, the Executive Engineer of the Division will furnish such, but it must be clearly understood that tenders must be received in order, and according to instructions.

15. The Executive Engineer or other sanctioning authority reserves the right to reject any tender or all the tenders as well as assigning any reason therefor.

16. When once the rates tendered are accepted they will not be revised under any circumstances.

17. No extra payment will be made for any extra hands that may be required during the execution of the work. The same shall be included in the rates for the respective items.
